Project Patch is a non-profit Christian-based residential treatment center for at-risk adolescents. Project Patch is located in the beautiful mountains of Garden Valley, Idaho just one hour from Boise. It is an outdoor lover's paradise with abundant wildlife and outdoor activities to enjoy.

Project Patch offers an educational program that is fully accredited by AdvancEd. Students who attend Project Patch are good kids who are starting to make unhealthy decisions. Most Project Patch students go on to complete their high school diplomas and many attend college after Patch. Class sizes are small and classroom management issues are minimal and handled by support staff.

Project Patch works on a year-round schedule with 10 weeks instruction and 3 weeks non-instructional time throughout the calendar year.
On-campus housing with affordable rent is available.

The right applicant will be a certified Secondary Education teacher for the state of Idaho, with endorsement(s) in English and/or History (or similar endorsement, such as Language Arts, Social Studies) and will possess the following skills and characteristics:

- Active listening
- Service-minded
- Critical thinking
- Initiative
- Team player
- Integrity

Curriculum Development:
- Prepare materials and classrooms activities typical for a one-room schoolhouse type setting.
- Modify the general education curriculum for special-needs students based upon a variety of instructional techniques and instructional technology.
- Working through our mastery-based program, establish clear objectives for all lessons, units, and projects and communicate those objectives to students.

Teaching:
- Instruct through individual tutoring, demonstrations, and limited lectures in the subjects of English and Social Studies with grades ranging from 7-12, including some organizing of instruction around the needs of those students below grade level.
- Develop and implement strategies to meet the needs of students with various levels of achievement, motivation, and ability.
- work with different instructional computer programs in the teaching process of students
- Encourage classroom management with the help of constant in-class support staff.
